EXPLANATION OF FORMAT

The period covered by this issue of the bibliography corresponds to the same months of *Index Medicus*. The journal coverage is limited to journals covered by *Index Medicus*, but the *Endocrinology Index* contains additional subject headings that are not included in *Index Medicus*. The *Endocrinology Index* is arranged in seven sections: 1) Table of Contents; 2) Subject Section; 3) Review Section; 4) Method Section; 5) Author Section; 6) Subject Index; and 7) Author Index.

Subject Section

The Subject Section is for the reader interested in recent literature related to certain broad topics and is divided into eight categories (pituitary, thyroid, etc.). The endocrine pancreas has not been included since it is the subject of another recurring bibliography, *Diabetes Literature Index*. Each category has a preconceived hierarchical organization of subject headings. A particular citation may appear more than once if it deals with multiple topics. Each citation to an article contains the full title, first author, and journal reference. If the article is written in a foreign language, the language is indicated. If the citation is to a review article, the number of references is given.

Author Section

The Author Section provides the reader with a list of keywords or index terms assigned to each citation. Each article appears only once. The citations are arranged alphabetically according to first author and are

numbered consecutively. These numbers are then used in the Author and Subject Indexes to enable the reader to identify references with ease. The complete citation (including index terms) are found but only the first three authors are listed. Foreign titles appear in original language; these titles have been translated into English in the Subject Section. Following each citation are index terms which have been assigned to describe the contents of the article. Index terms appear in capital letters; some of these are accompanied by subheadings which appear in lower case letters. Asterisks (*) identify the index terms under which article appear in *Index Medicus*.

Subject Index

All of the index terms assigned to the citations appearing in the bibliography are listed, followed by citation numbers which correspond to the numbers in the Author Section. The Subject Index is included for the convenience of the reader who wishes to select articles falling in categories of his own conception. For example, one who is interested in protein binding of a particular hormone could quickly find whether there were any articles dealing with this subject by determining if there were any citation numbers common to the two headings "protein binding" and the name of the specific hormone.

Author Index

The names of all authors are listed, followed by citation numbers which correspond to the numbers in the Author Section.

DISTRIBUTION

This publication is available free to National Institutes of Health grantees and contractors working in the field of endocrinology and libraries of medical schools. Requests from these qualified individuals to receive free copies of this publication must include their grant or contract number and the title of their project. These requests as well as address changes and other communications should be addressed to:

Scientific Communications Office
Endocrinology Index
National Institutes of Arthritis, Metabolism
and Digestive Diseases
National Institutes of Health
Bethesda, Maryland 20014

Other individuals and libraries may receive this publication by subscribing directly to the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. One year's subscription includes 6 bimonthly issues. Subscription price per year in the United States, Canada, and Mexico, \$40.00; foreign, \$10.00 additional; and \$6.75 for a single copy in the United States, Canada, and Mexico; foreign, \$2.30 additional. Payment is required in advance, and check or money order should be made payable to the Superintendent of Documents.

PREFACE

The *Endocrinology Index* is a bimonthly publication of the National Institute of Arthritis, Metabolism, and Digestive Diseases. This selected bibliography which is produced from the National Library of Medicine's Medical Literature Analysis and Retrieval System (MEDLARS), has been initiated to supply those scientists working in the field of endocrinology with a much needed current awareness tool and is intended to help facilitate greater integration of research and clinical efforts in this field.

Endocrinology Index was developed with the support of contract PH43-66-480 in 1966-70 to Vanderbilt University under the direction of Grant W. Liddle. The National Institute of Arthritis, Metabolism, and Digestive Diseases is most appreciative of the fine work in originally developing and editing the *Index* provided by Grant W. Liddle and Victoria Ragin Liddle and for their continuing editorial advice in making the *Endocrinology Index* a most important and necessary component of endocrinology literature within the biomedical research community.

The Secretary of the Department of Health, Education, and Welfare has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through April 30, 1981

I. Physical and Functional Aspects

PITUITARY FUNCTION TESTS

- XO/XY mosaicism with non fluorescent Y chromosome: clinical, cytogenetic and endocrinological studies on a female subject. Melis GB, et al. *Acta Eur Fertil* 8(4):283-96, Dec 77 (Eng, Ita)
- Anesthesia for transsphenoidal surgery of the hypophyseal region. Messick JM Jr, et al. *Anesth Analg* (Cleve) 57(2):206-15, Mar-Apr 78
- Pituitary-testicular interrelationships in mumps orchitis and other viral infections. Adamopoulos DA, et al. *Br Med J* 1(6121):1177-80, 6 May 78
- Prolactin-secreting pituitary microadenoma: detection and evaluation. Wiebe RH, et al. *Fertil Steril* 29(3):282-6, Mar 78
- Comparative studies of pulsatile and nonpulsatile flow during cardiopulmonary bypass. III. Response of anterior pituitary gland to thyrotropin-releasing hormone. Taylor KM, et al. *J Thorac Cardiovasc Surg* 75(4):579-84, Apr 78
- [The sella turcica and pituitary function in congenital hypothyroidism due to thyroid ectopia or hypogenesis (author's transl)] Fossati P, et al. *Nouv Presse Med* 6(45):4177-82, 31 Dec 77 (Eng. Abstr.) (Fre)
- [Utility of the gonadotropin releasing hormone stimulation test in the anovulatory patient] Moggi G, et al. *Minerva Ginecol* 29(11):877-9, Nov 77 (Ita)
- [Early detection and treatment of neuroendocrine-metabolic disorders and endometrial pathology as prophylaxis of corpus uteri cancer] Griaznova IM, et al. *Akush Ginekol* (Mosk) (3):21-5, Mar 78 (Rus)

METHODS

- Combined test of anterior pituitary function in children. Savage DC, et al. *Arch Dis Child* 53(4):301-4, Apr 78
- The sulpride test in panhypopituitarism. Batrinos ML, et al. *Clin Endocrinol (Oxf)* 8(3):193-6, Mar 78
- [Evaluation of test methods in clinical diagnosis: metabolic diseases and endocrinopathies] Schöffling K. *Verh Dtsch Ges Inn Med* 83:672-91, 17-21 Apr 77 (Ger)

PITUITARY GLAND

- [Animal experiment studies on the neurohumoral control of female puberty] Döcke F, et al. *Zentralbl Gynaekol* 100(1):3-12, 1978 (Eng. Abstr.) (Ger)

ABNORMALITIES

- Prenatal diagnosis of primary pituitary dysgenesis [letter] Stoll C, et al. *Lancet* 1(8070):932, 29 Apr 78
- [Immunologic and endocrinologic considerations apropos of a case of acardial] Negro M. *J Gynecol Obstet Biol Reprod (Paris)* 6(7):963-70, Oct-Nov 77 (Eng. Abstr.) (Fre)

ANALYSIS

- beta-endorphin: cellular localization, electrophysiological and behavioral effects. Bloom FE, et al. *Adv Biochem Psychopharmacol* 18:89-109, 1978 (46 ref.)
- Immunological characterization of beta-lipotropin fragments (endorphin, beta-MSH, and N-fragment) from fish pituitaries. Pezalla PD, et al. *Gen Comp Endocrinol* 34(2):163-8, Feb 78
- Distribution of ACTH-like immunoreactivity in rat brain and

- gastrointestinal tract. Larsson LI. *Histochemistry* 55(3):225-33, 4 Apr 78
- A naturally occurring structural variant of human growth hormone. Lewis UJ, et al. *J Biol Chem* 253(8):2679-87, 25 Apr 78
- Characterization of pro-opiocortin, a precursor to opioid peptides and corticotropin. Rubinstein M, et al. *Proc Natl Acad Sci USA* 75(2):669-71, Feb 78
- [Opiate receptors and endorphines (author's transl)] Taube HD. *Anaesthesist* 27(1):2-9, Jan 78 (118 ref.) (Eng. Abstr.) (Ger)

ANATOMY & HISTOLOGY

- Synthesis of LH-RH by rat hypothalamic tissue in vitro. II. Effect of short-term orchectomy and estradiol benzoate therapy. Hall RW, et al. *Neuroendocrinology* 24(5-6):325-32, 1977

BLOOD SUPPLY

- [At-rest values of the distribution of cardiac minute ejection volume and local tissue blood flow in rats exposed to intermittent high-altitude hypoxia and physical strain] Barta E, et al. *Fysiatr Reumatol Vestn* 56(1):4-15, Feb 78 (Eng. Abstr.) (Slo)

CYTOLOGY
